

DELTA FIRE PROTECTION DISTRICT

BOARD OF DIRECTORS

OUT OF SERVICE AREA AGREEMENT

Resolution 2019-05

The Delta Fire Protection District encompasses Highway 12 from the Sacramento County line (halfway across the Rio Vista Bridge) to Jackson Slough Road/Hwy 12, with the exception of a small “triangular” shaped area on Highway 12 that shows to be within River Delta Fire District boundaries (map attached). The original Delta Fire Protection District boundaries were drawn prior to Highway 12 being constructed and can create emergency response confusion.

The purpose of this Resolution is to address response areas for both the Rio Vista Fire Department Station 55 (under contract to Delta Fire Protection District) and the River Delta Fire Protection District Station 94 (formerly known as Isleton Fire Protection District). In the past, issues regarding boundaries and service provided on Highway 12 were addressed with “hand-shake agreements”. This Resolution will clarify the boundaries (as provided by LAFCO) and codify a response agreement between the two agencies, for local Fire Dispatch centers and historical records.

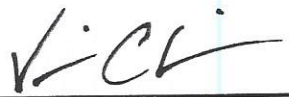

In the interest of public and firefighter safety, and to ensure closest resources are responding, Rio Vista Fire AND River Delta Fire will BOTH respond ‘all-risk’ incidents on Highway 12, between the Rio Vista Bridge and Jackson Slough Rd. As the physical boundaries are not clearly identified along the highway, the Rio Vista Fire Department (under contract with the Delta Fire Protection District) retains the right to respond to incidents on Highway 12 (Rio Vista Bridge to Jackson Slough Rd) in order to meet the requirements of our service contract.

Due to the location of the Fire Station(s), we need to ensure the closest most appropriate resource responds; and that we are making the best decisions for the safety and service of the motoring public. Sacramento Regional Dispatch Center (SRFECC) has recently adjusted the boundaries of Rio Vista responses to match the actual Delta District boundaries (Hwy 12 east to Jackson Slough). With these recent response area adjustments, River Delta Station 94 may now be much closer to incidents on Hwy 12 in the Delta Fire Protection District - and as such should be on many of those responses to provide an initial response and size-up.

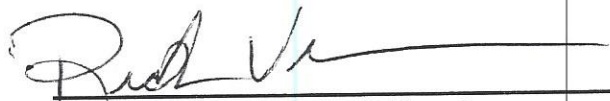

Rio Vista Fire Department will be notified of any and all incidents within the Highway 12 corridor (Rio Vista Bridge to Jackson Slough Rd) for response and has the right to assume Incident Command of incidents in its jurisdiction. This resolution does not constitute a Mutual Aid Agreement.
